

**SUBJECT:** Office of Independent Oversight's Office of Environment, Safety and Health Evaluations Activity Report for Participation in the Washington River Protection Solutions, LLC Integrated Safety Management System Annual Review, September 2010

The U.S. Department of Energy, Office of Independent Oversight, within the Office of Health, Safety and Security (HSS), participated in the review of the Washington River Protection Solutions, LLC Integrated Safety Management System Annual Review for 2010. The review was conducted during the period of August 23 to September 2, 2010, and focused on six functional areas: corrective action management, work planning and control, radiological protection, environmental protection, emergency preparedness, and commercial grade dedication. One HSS representative participated as a team member, focusing on the review of the work planning and control function area, and another HSS representative participated as an observer.

The results of the review are documented in a final report, which was issued by the review team on September 28, 2010, and is being retained by the Office of River Protection. Click on closeout slides to review the slides presented at closeout.
